

average of 45 minutes per respondent is needed to complete the exit survey. The estimated range of burden for jAC members is expected to be between 30 minutes to 1 hour for completion. An estimated 1,000 children will take part in the survey annually. The survey for assessing the child's understanding of immigration proceedings is estimated to take 1.5 hours per respondent to complete. The estimated range of burden for surveyed children is expected to be between 1 hour and 2 hours for completion. The factors considered when creating the burden estimate were the young age of the children (between the ages of 12 and 16) and the fact that the survey would be conducted via an in-person interview. An estimated 200 jAC program stakeholders will take part in the survey annually. Based on similar surveys used by Vera to evaluate other programs, an average of 75 minutes per respondent is needed to complete the exit survey. The estimated range of burden for jAC program stakeholders is expected to be between 30 minutes to 2 hours for completion.

6. *An estimate of the total public burden (in hours) associated with the collection:* The estimated public burden associated with this collection is 1825 hours. It is estimated that 100 jAC members will take 45 minutes hour to complete the survey; 1,000 children will take 1.5 hours to complete the survey; and 200 jAC stakeholders 75 minutes to complete the survey. The burden hours for collecting respondent data sum to 1825 hours ((100 jAC members × 45 minutes = 75 hours) + (1,000 children × 1.5 hours = 1,500 hours) + (200 jAC stakeholders × 75 minutes = 250 hours)).
